Example Calculation:

Purchase Feb 2010 for \$135,000 and paid \$5000 closing costs. List for sale Feb 2015 and estimate closing costs at \$10,000.

- **Adjusted Purchase Price:** $135,000 + 5,000 + 10,000 = \mathbf{\$150,000}$
- **Affordable Price:** *Adjusted Purchase Price shall be multiplied by a fraction, the denominator of which is the CPI-U for the month and year the Home is listed for sale and the numerator of which is difference between the CPI-U for the month and year the Home is listed for sale and the CPI-U for the month and year of the purchase of the Home, which sum shall then be added to the Adjusted Purchase price to arrive at the Affordable Price.*
 - CPI-U All items Feb 2010 (purchase date): **226.529**
 - CPI-U All Items Feb 2015 (listing date: - **242.424**
 - Difference between CPI at listing and at purchase: $242.424 - 226.529 = \mathbf{15.895}$
 - $\mathbf{15.895/242.424} = .06556 \times \mathbf{150,000} = 9,834 + \mathbf{150,000} = \mathbf{\$159,834}$ **Affordable Price**
